The Critique of Theological Reason-James P. Mackey 2000-10-12 Far from merely reinvigorating relativism, postmodernism has detected and expressed in our time a powerful nihilating process of which truth and reality itself are the final casualties; and with these morality and religion. Beginning from the theological reaches of philosophy, this book argues that gods played a crucial part in modern philosophy, even when it was most critical of them; that the dominant nihilism of Derrida is really an excessive and misleading outcome of a contemporary philosophy which could otherwise resonate with all that is best in our evolutionary image of the universe; that moralists who turn to art in order to overcome the fact-value version of this deadly dualism do not thereby rule out religion; and that a Christian theology which recognises the evolutionary and historical conditions of faith and revelation is once again producing a theology that builds upon the best of contemporary philosophy and science.

Language Variety in the South Revisited-Cynthia Bernstein 2014-01-22 Top linguists from diverse fields address language varieties in the South. Language Variety in the South Revisited is a comprehensive collection of new research on southern United States English by foremost scholars of regional language variation. Like its predecessor, Language Variety in the South: Perspectives in Black and White (The University of Alabama Press, 1986), this book includes current research into African American vernacular English, but it greatly expands the scope of investigation and offers an extensive assessment of the field. The volume encompasses studies of contact involving African and European languages; analysis of discourse, pragmatic, lexical, phonological, and syntactic features; and evaluations of methods of collecting and examining data. The 38 essays not only offer a wealth of information about southern language varieties but also serve as models for regional linguistic investigation.
